#### Reason of revision

The previous projection of fiscal year ending March 2011 is revised as described above. This revision takes into account our expectations for favorable automobile sales particularly in North America and China despite the anticipated foreign exchange loss due to the strong yen (against the US\$).

The revised projection of the current fiscal year is based on assumed foreign exchange rates of ¥86/US\$1.0 (¥89 at the previous announcement) and ¥113/EUR1.0 (unchanged from the previous announcement). Also, the outlook for the second half of the current fiscal year is based on assumed foreign exchange rates of ¥83/US\$1.0 and ¥110/EUR1.0.

Note: Above mentioned projections are based on certain assumptions and our management's judgment in light of currently available information, therefore actual results may differ from these projections.

End.
